Sample Screening Report

Your Tenant Screening Report format can be configured however you choose. Here are the components of a sample screening report:

- 1 Submission Data** - To start, enter the applicant's legal name, date of birth, SSN and current residence.
- 2 SSN Verification** - Verifies Social Security number to ensure it is accurate and assigned to your applicant.
- 3 Criminal Background Check and Sex Offender Search** - Search the state criminal database of your choosing as well as the National Sex Offender registry to screen potential tenants. Multi-State Checks are also available.
- 4 Eviction Report** - National eviction records search to show any past eviction history and judgment amounts.

Getting Started with TenantReportX is Easy

Pick the Solution That's Right for You:

Express Connect

Receive reports as you need them.

- Doesn't require formal account set up through TenantReportX
- Screening paid for by applicant
- Easily invite applicant via email to complete online application form and select which reports to order
- Have the applicant order their own report with no intervention from you

Create an Account

- Select individual reports you want to receive or select custom bundle package of screening services
- Decide if you want to cover the costs or if you want the applicant/tenant to pay (most common)
- Enroll in our Partner Program and generate revenue from the applicant-purchased reports. Simply set the price you want to charge the applicant. TenantReportX will collect payment from your applicant via credit card and then mail out a check the 1st week of the following month for the difference of the cost of the credit report and set application fee

Applicant Tracking System & Quick Applications

A quicker way to get tenants into your properties!

Our goal is to help you turn applicants into residents as quickly and simply as possible. Our robust onboarding technology, Quicklease Pro, is easily configurable and user friendly.

Highly Configurable Online Application Forms

- Our FCRA and E-signature compliant forms can be customized according to your needs
- The link to your online application can be embedded anywhere you choose – such as on your website or other preferred Internet listing service.

Generate Pre-Filled Leases

- After uploading your lease form, you can automatically generate a new contract for each applicant by using pre-entered data.

Automated Notifications

- Automatic email notifications provide real-time feedback with the status of each applicant as they progress through the screening process.

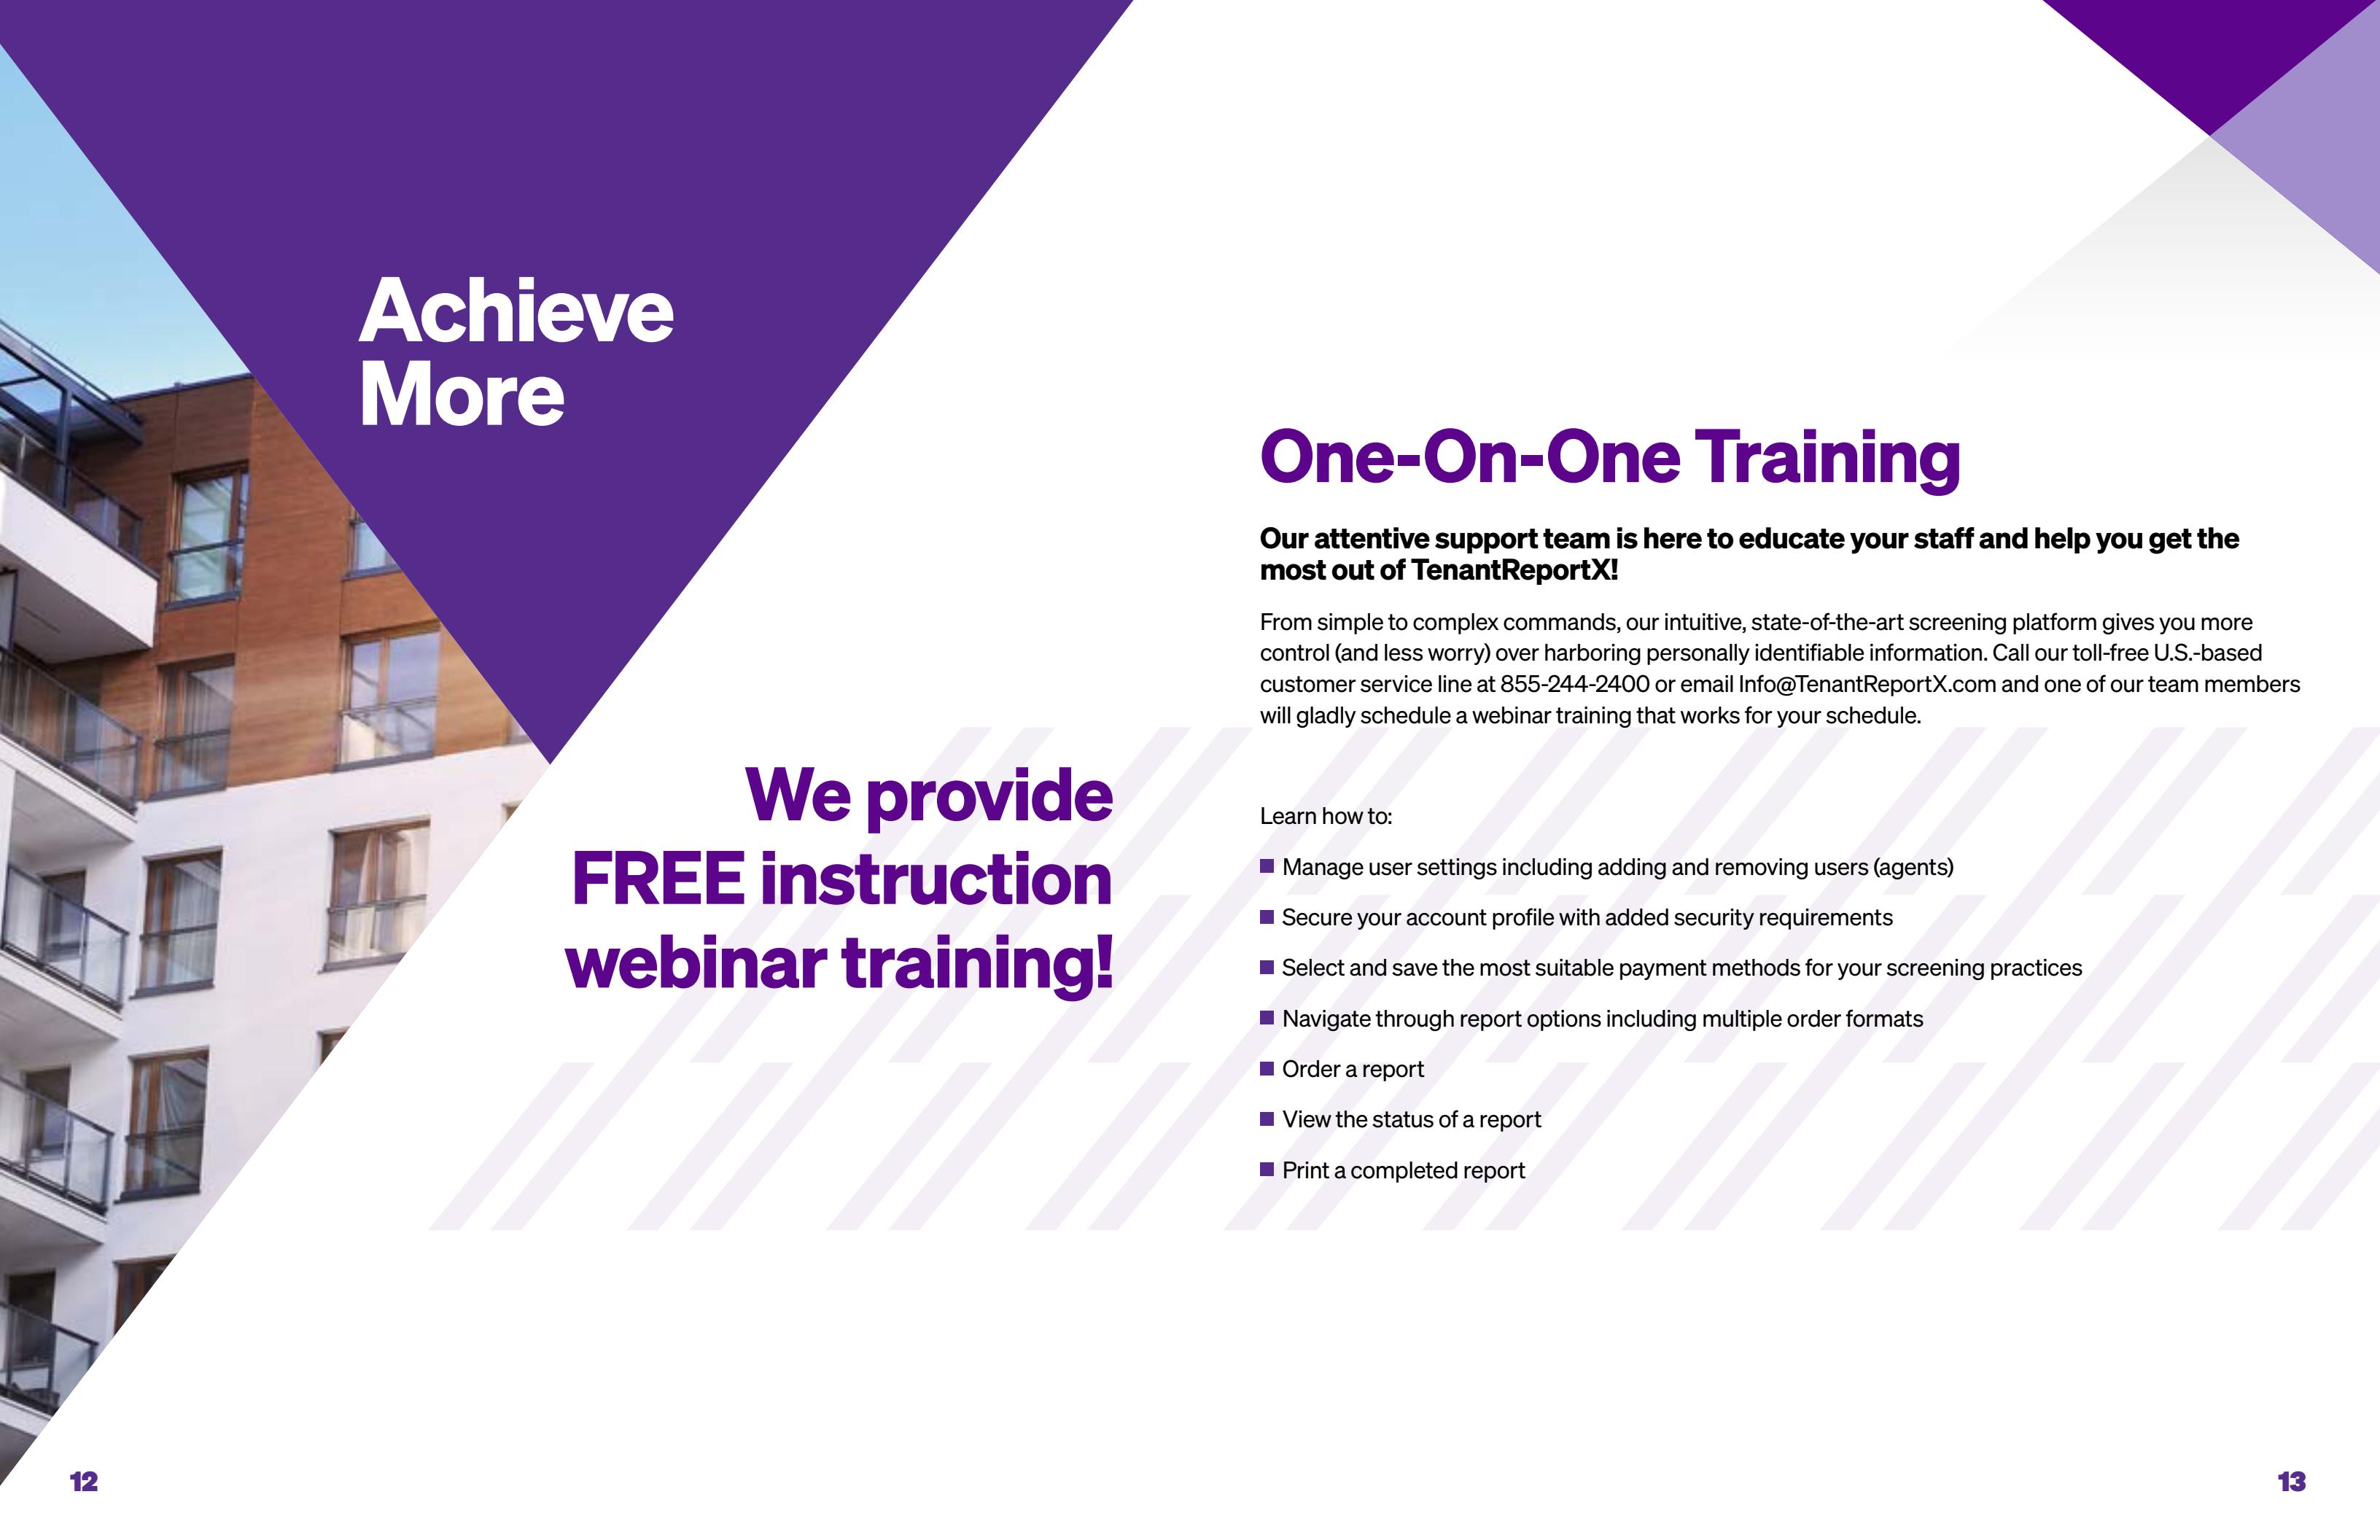

Simple Applicant Tracking Tools

- View or print applications, review credit/background check reports, make decisions, and manage documents all in one user friendly system. Quicklease Pro's responsive design is optimized for mobile, tablets and laptops.

Quick Applications

When you have your tenants apply and pay directly, you can:

- Capture electronic consent authorization
- Access but not store sensitive information. No more holding onto sensitive applicant information
- Send to multiple prospective tenants
- Secure – redacted SSN, date of birth, and account numbers to reduce sensitive data

Secure and Reliable

The Secure Way to Screen Tenants

Easily Integrate through Our APIs

TenantReportX offers two separate APIs that will integrate our platform into yours. Easily assess our data and solutions through our XML or JSON APIs.

Data Security is our Number One Priority

We start with continuous SOC II compliance from an independent third party, Sword and Shield Enterprise Security. We then enlist the help of security expert Qualys to continuously monitor our security and compliance landscape across our entire platform.

Our website is Hyper Text Transfer Protocol Secure (HTTPS) which is the secure version of HTTP, the protocol over which data is sent between your browser and the website that you are connected to. The “S” at the end of HTTPS stands for Secure. It means all communications between your browser and the website are encrypted.

Multi-Factor Authentication via text and email are used to verify identity before gaining access to our platform.

Security features:

- Continuous monitoring
- Constant feature updates
- Manageable permissions
- Data encryption
- Multi-factor authentication
- Password management
